Webex Virtual Classroom [nicolo.chierichetti](https://politecnicomilano.webex.com/join/nicolo.chierichetti)
politecnicomilano.webex.com/join/nicolo.chierichetti

A collection of built houses and future public hybrid buildings. Some of these spanish architectures investigate the idea of working with existing architectural structures, and how the design is determined by them. All projects are presented by a clear and essential structural idea that orders not only the interior spaces but also the urban ones, following the tradition of the School of Madrid (ETSAM).

DISCUSSANT • Prof. Maria Pilar Vettori (dABC)

MODERATION • Nicolò Chierichetti (DASU)

On the occasion of the **international mobility call**, the end of the lecture will be focused on **ETSAM**.

For students of 2nd and 3rd year of Architectural Design + 1st year of Master programs in Architecture.

INTERNATIONAL MOBILITY | ETSAM
